Journal of Statistical Planning and Inference 37 (1993) 413–414
North-Holland

Author Index Volume 37 (1993)*

Akritas, M.G. and W. Albers, Aligned rank tests for the linear model with heteroscedastic errors (1) 23– 42
Alam, K. and K.B. Kulasekera, Estimation of the quantile function of residual life time distribution (3) 327–337
Albers, W., *see* M.G. Akritas (1) 23– 42
Bagchi, S. and C.-S. Cheng, Some optimal designs of block size two (2) 245–253
Billington, E.J., A. Khodkar and E.S. Mahmoodian, Balanced ternary designs with block size four (1) 95–126
Bischoff, W., On D-optimal designs for linear models under correlated observations with an application to a linear model with multiple response (1) 69– 80
Chaloner, K., A note on optimal Bayesian design for nonlinear problems (2) 229–235
Chao, M.T. and G.D. Lin, The asymptotic distributions of the remedians* (1) 1– 12
Chatterjee, K. and R. Mukerjee, Search designs for estimating main effects and searching several two-factor interactions in general factorials (3) 385–392
Cheng, C.-S., *see* S. Bagchi (2)245–253
Cuevas, A. and J. Romo, On robustness properties of bootstrap approximations (2) 181–191
Cutler, D.R., Efficient block designs for comparing test treatments to a control when the errors are correlated (3) 393–412
George, E.I. and R. McCulloch, On obtaining invariant prior distributions (2) 169–179
Hardin, R.H. and N.J.A. Sloane, A new approach to the construction of optimal designs (3) 339–369
He, K., The estimation of stratum means vector with random sample sizes (1) 43– 50
Jandhyala, V.K. and C.D. Minogue, Distributions of Bayes-type change-point statistics under polynomial regression (3) 271–290
Jandhyala, V.K., A property of partial sums of regression least squares residuals and its applications (3) 317–326
Jensen, D.R. and D.E. Ramirez, Efficiency comparisons in linear inference (1) 51– 68
Khodkar, A., *see* E.J. Billington (1) 95–126
Kulasekera, K.B., *see* K. Alam (3) 327–337
Kunert, J., A note on optimal designs with a non-orthogonal row–column-structure (2) 265–270
Lavine, M., L. Wasserman and R.L. Wolpert, Linearization of Bayesian robustness problems (3) 307–316
Lin, G.D., *see* M.T. Chao (1) 1– 12
Liski, E.P., H. Toutenburg and G. Trenkler, Minimum mean square error estimation in linear regression (2) 203–214
Mahmoodian, E.S., *see* E.J. Billington (1) 95–126
Marín, J., *see* J.M. Ruiz (1) 13– 22
Mathar, R. and R. Meyer, Preorderings monotone functions, and best rank r approximations with applications to classical MDS (3) 291–305
Mathew, T., *see* L. Zhou (2) 215–227
McCulloch, R., *see* E.I. George (2) 169–179

* The issue number is given in front of page numbers.
